Electronics leads category sales

Electronics is the largest category, but sales are distributed across five categories.

LEADING CATEGORY

₹17.31M

Electronics

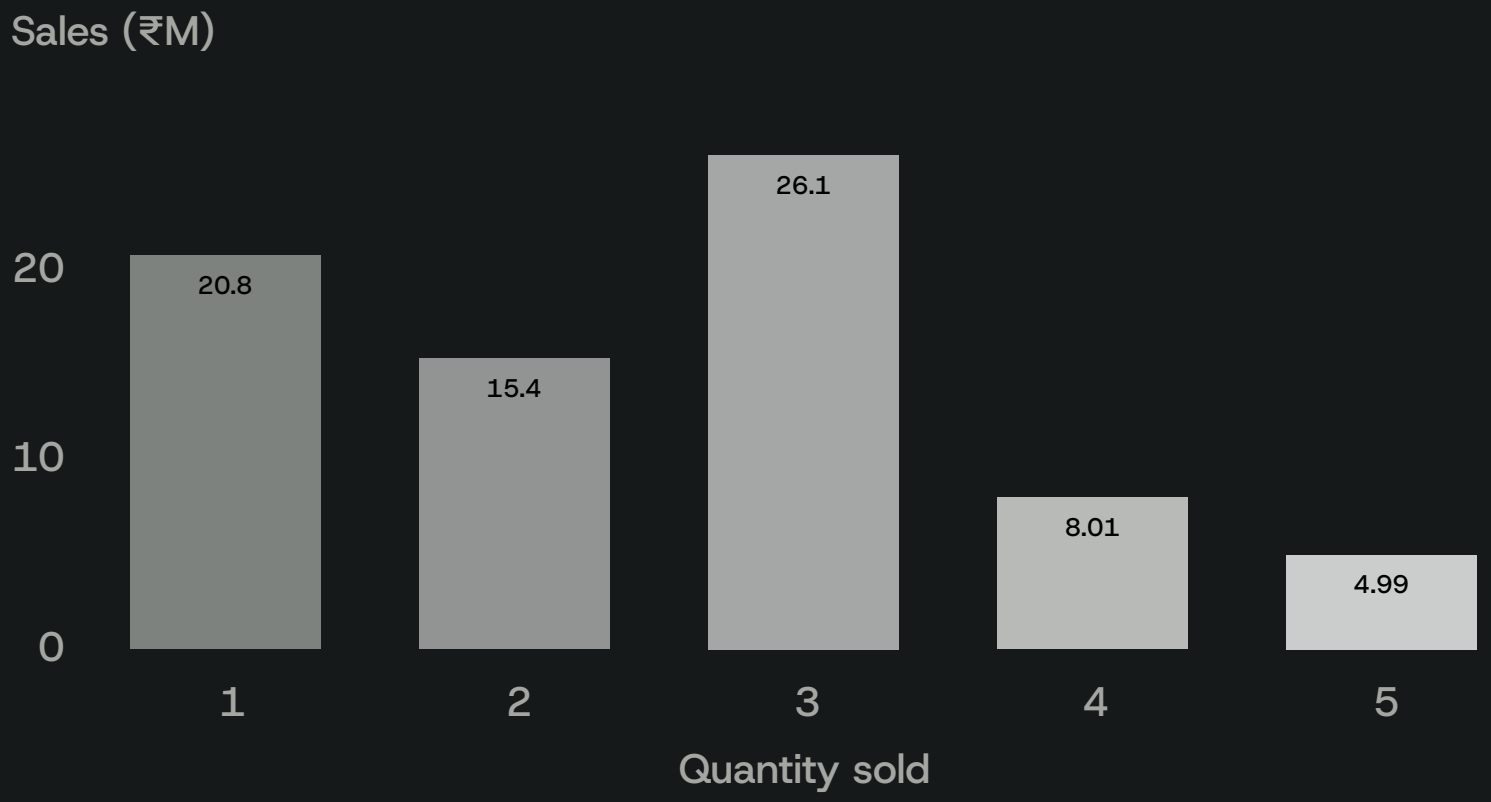

23.01% of total sales.

Home & Kitchen is the smallest category at ₹13.33M.

Made with GAMMA

Quantity 3 drives the largest share of sales

Orders with quantity 3 contribute the largest share of total sales.

LARGEST CONTRIBUTION

₹26.08M

Quantity 3

34.67% of total sales.

Quantity 4–5 combined contribute ₹13.00M, or 17.28%.

Made with GAMMA

Demand is concentrated in a late-year spike

The displayed scales show a strong late-year concentration, but the apparent 2025 drop needs validation.

Validate before forecasting

Audit the date filter and year completeness before treating the drop as a business trend.

Approximate values are read from the displayed chart axes.

YEAR VIEW · APPROXIMATE

≈3K

2024 quantity sold

Quantity sold is near zero in 2025, based on the chart scale.

MONTHLY VIEW · APPROXIMATE

≈10

December quantity sold

Most months remain low, while December rises to approximately 10 units on the displayed scale.

What this dashboard says to investigate next

Three focused questions can turn the dashboard readout into a sharper operating view.

01

Protect the leader

Protect Electronics leadership while testing growth in Home & Kitchen.

02

Explain quantity 3

Understand why quantity-3 orders generate the strongest sales contribution.

03

Audit the signal

Audit 2025 coverage and the December spike before making forecasts.

Approximate values are read from chart axes; exact underlying rows should be used for decisions.
